

Luis Queral

Digital Product Design & Research

Work Experience

Product Designer, 2017-Present

Postlight — New York, NY

Postlight is a digital product studio, focused on the design, development, and strategy of software infrastructure projects.

- Part of a small and focused team of three designers embedded within Goldman's Sachs flagship trading software (Marquee).
- Determined project OKR's and high-level product strategy while meeting aggressive timelines.
- Validated design work through user research and highly detailed interactive prototypes using Framer and Principle.
- Set the foundation for software used to move over \$500 billion worth of transactions a month.

UX Designer, 2014-2017

Blenderbox — Brooklyn, NY

Blenderbox is a full-service interactive design & development agency with a focus on non-profit and cultural organizations.

- Led the design of a diverse range of custom web applications including the redesign of a major international airport system, a children's museum, and a corporate intranet.
- Executed a wide range of UX research, including sitemap audits, in-person usability studies, and user interviews.
- Assisted in the architecture of front-end systems for a variety of Python (Django) and PHP (Wordpress, Kirby) based stacks.

Design Intern, 2013-2014

Figure 53 — Baltimore, MD

Figure53 is a independant software company that makes software for artists. They are most known for their flagship software QLab.

- Prototyped an experimental, multi-channel audio panning tool designed for spatial sound design work.

UX Design Intern, 2012

r2integrated — Baltimore, MD

R2i is a full-service digital marketing agency that helps brands accelerate customer connections through strategy, data, media, and cloud technology.

Assistant Researcher, 2012

University of Maryland — Baltimore, MD

Served as a research assistant and webmaster for an NSF- funded usability research project.

Objective

To work with an interdisciplinary team of designers and developers to produce delightfully functional and human-centered software experiences.

Education

University of Maryland (UMBC), 2013

B.A. Interaction Design
