Web Development HTML – Tables

- *Head to Glitch*
- *click 'New Project'*
- *& select 'hello-webpage' to start a new activity!*
- *name your project something specific!*
- *find your way to 'index.html' in the panel*

After the \<body> tag add the following:

```
<table>
     <thead>
          <tr>
               <th>Book</th>
               <th>Title</th>
               <th>Author</th>
          </tr>
     </thead>
</table>
```

```
1 ∨  <table>
2 ∨       <thead>
3 ∨            <tr>
4 ∨                 <th>Book</th>
5 ∨                 <th>Title</th>
6 ∨                 <th>Author</th>
7                </tr>
8           </thead>
9      </table>
10
```

After the closing thead tag, add the following:

```
<tbody>
        <tr>
                <td>Android Phone</td>
                <td>Author</td>
                <td>ISBN</td>
        </tr>
</tbody>
```

```
1 ˅   <tbody>
2 ˅        <tr>
3 ˅             <td>Android Phone</td>
4 ˅             <td>Author</td>
5 ˅             <td>ISBN</td>
6          </tr>
7      </tbody>
8
```

- ***Copy and paste the tr tags and everything inside of it (The tr tags should be siblings of one another)***
