Intro to Web Development CSS – Styling Texts

- *Head to Glitch*
- *click 'New Project'*
- *& select 'hello-webpage' to start a new activity!*
- *name your project something specific!*
- *find your way to 'index.html' in the panel*

In the CSS section, type the following:

Inside of the **p** declaration:
- font-family: Helvetica;
- font-size:1.4em;
- color:blue;
- line-height:1.5;

```
p {

}
```

Inside of the **.center** declaration:
- text-align:center;

Inside of the **.right** declaration:
- text-align:right;

Inside of the **ul** declaration:
- text-transform: lowercase;
- text-decoration:underline;
- list-style-type: none;
  - Change the list-style-type property to square, watch what happens
  - Change the list-style-type property to circle, watch what happens

---

```
.center {

}

.right {

}

ul {
```

Inside of the **ol** declaration:
- text-decoration:line-through;
- Inside of the a declaration
- color:blue;
- transition: 0.5s all;

Inside of the **a:hover** declaration:
- color:green;

Inside of the **a:active** declaration:
- color:red;

```
}
ol{

}
a {

}
a:hover {

}
a:active {

}
```

ADVANCED CSS SECTION:

Inside of the **p** declaration:
- animation-duration: 3s;
- animation-name: slidein;
- animation-iteration-count: 3;
- animation-direction: alternate;

Remove the comments in the @keyframes section at the bottom of the PDF
Learn more about all of the animation properties:

```
/*
@keyframes slidein {
  from {
    color: blue;
    margin-left: 100%;
    width: 300%;
  }

  to {
    color: green;
    margin-left: 0%;
    width: 100%;
    font-family: Helvetica;
    font-size: 1.4em;
    line-height: 1.5;
  }
}
*/
```
